Differential Diagnosis of ASD: Early Childhood

Sommer Bishop, PhD
Professor in Residence
Department of Psychiatry and Behavioral Sciences
Weill Institute for Neurosciences
Center for ASD and NDDs
University of California San Francisco

4.0 CE credits available to psychologists and social workers who sign in with their full name, attend the entire workshop, and complete a survey which will be emailed following the completion of the workshop.

Overview

Cost
$150 (+ optional $50 CE fee)

Date
Friday, October 6, 2023

Time
11:00am-3:00pm EST
10:00am-2:00pm CST
9:00am-1:00pm MST
8:00am-12:00pm PST

Type of Workshop
Live Online Workshop via Zoom

Prerequisite Training
These workshops are intended for clinicians and researchers involved in the diagnostic assessment of ASD.

Learning Objectives

1. Identify issues to consider when attempting to differentiate between ASD and other disorders associated with social-communication deficits and/or restricted and repetitive behaviors.
2. Utilize recent research, including studies detailing the use of specific diagnostic instruments in early childhood.
3. Describe how social communication abnormalities, restricted and repetitive behaviors, and developmental histories of children with ASD may be similar or different compared to children with other diagnoses.

Speaker Disclosures

Western Psychological Services (WPS), publisher of the ADDOS-2, does not fund the GAIN program. GAIN focuses on the ADDOS-2 only and will not include explicit training on other instruments. Dr. Sommer Bishop receives honoraria from WPS as an author of the ADDOS-2. This will not influence her discussion and she will not make recommendations for commercial products. She has no non-financial disclosures related to ADDOS-2.
